

NSI On Deck Stand Up Paddle Board Accessories

New from NSI, first on the wave for innovative Stand Up Paddle Board accessories, a unique line of "On Deck" accessories. Utilizing the NSI Deck Mount Attachment System, in combination with carry aboard dry bags, coolers, and other handy deck accessories for day trippin' or long cruisin' tours.

NSI DECK MOUNT ATTACHMENT SYSTEM

Universal deck mount system for taking supplies on deck!

NSI's versatile Deck Mount Attachment System features two styles of adhesive plates with easy on/off attachment systems. These bomber adhesive plates allow paddlers to attach accessories to the deck or rails of any board. The Rubber Style Plate is ideal for dry bags, coolers and other deck accessories. They are sold individually with spectra loop. NSI's Surface Mount Insert Plates have threaded inserts that offer secure attachment for

board handles, water bottle cage or other carry along items. They are sold individually, with stainless washer and bolts, or a set of two with webbing and male/female buckles. Create your own system, mounting your existing cooler, Crazy Creek chair, dry bag or anything you want to take on the water with you.

LONG STRAP & PAD FREE RIDE SYSTEM *Ultimate freedom of movement for surf riding!*

The Long Strap is an 18" x 2.5" wide strap, which can attach directly to NSI Surface Mount Footstrap Inserts or the NSI Free Ride Pad. The Free Ride Pad has inserts at a 15.5" spacing and an aggressive arch pad in the middle of the pad. This tail pad system allows for ultimate back foot placement while riding in the surf. The front position for light wind or low wind riding, the middle position for all around riding and catchin' some air, and the rear position allows for aggressive vertical snaps and speed control. The wide range of quick foot movement makes this the ultimate surf riding pad system. Available Strap only or complete Pad Strap System.

NSI KLING-ON HOOKS *Strapless riding!*

These foam shaped foot grabs are perfect for anyone who wants strapless riding freedom with some strapped security. The Kling-On Hooks can be mounted using existing board inserts, or with NSI Surface Mount Inserts or Surf N Skim Pads. Placement can be on the outside or the inside of the foot, which creates a broader range of movement and freedom in strapless riding foot position. The medium density foam design can be molded and sanded to custom fit the contours of your foot.

DUCK CLAWS *Duck diving grips for piercing monster swell!*

Duck Claws duck diving grips are stomp pads for your hands. The grips allow you to dive deeper and get out to the lineup faster. Experienced surfers will appreciate the bomb proof grip for getting their boards deeper under the power of oncoming heavy swell. New surfers will appreciate how the grips make the initially awkward art of duck diving just click.

The tear-drop shape accommodates the key traction areas, from the initial push with extended thumb and fingers, to the final fully wrapped grip of the rails. The broad area of EVA foam provides surface traction you just can't get from fiberglass or wax. In the final stage of the duck dive, the raised EVA foam wedge lands snug between your thumb and forefinger, eliminating any slipping

motion your board may have independent of your hands. The Duck Claws create an immediate connection between surfer and board for diving deeper and piercing through underwater wave energy walls.

Available in two models: Standard or Pro. The Standard Claws feature a smooth, low profile layer, and medium density grip wedge. The Pro model offers a thicker, machine grooved EVA layer for greater traction in even the most extreme surf conditions. Both models utilize NSI's bomber 3M® peel and stick, allowing easy placement to the exact location of your individual grip zone.

THE "EEL" REEL LEASH

New Quick Release buckle/clips!

The EEL incorporates several modifications. The feed port is re-enforced from the inside, reducing the weight, but maintaining durability. The shock cord is replaced with a 30-inch, ¼ inch diameter rope extension, which is doubled over, stitched and rubberized to toughen it up and repel water. The snap hook, rated at 270 lbs, is attached to the rope extension and the leash strap. If the clip jaws give, the clip stays with the board.

Replacement clips are available. Both the EEL and RE ENFORCED REEL are available with the new Quick Release side buckle/clips. This accommodates quick and easy, one handed disconnect from the board. The Quick Release buckle/clips have a 300lb break strength.

Available immediately with the EEL model, and coming soon with the RE ENFORCED model.
